FORESTRY

LINING OUT STOCK

TREE SEEDS

SEASON 1923-1924

Our Seedlings and Transplants, the best obtainable.

TREE SEEDS

We have during the past season supplied several thousand pounds of tree seeds to many purchasers, including the leading Forestry Companies and State Departments. Orders were awarded us, as for several years past, on fresh seed in competition with other firms, and in many instances below the current market price. Our collectors in this country, Canada and Europe are now at work on the 1923 crop.

We append a few special items from our complete list for this Fall and Winter. Since the crop is not yet mature, all prices are subject to change without notice. We would, therefore, recommend early reservations to avoid disappointments. Prices quoted are on orders of 5 pounds or more, except where otherwise stated, all f. o. b. New York City. Write for quotations on any other varieties of Tree Seed you may require.

Don L. H.

EVERGREEN AND DECIDUOUS SEEDLINGS AND TRANSPLANTS

Forestry Stock Planted in 1909 When 8 in. High—16 ft. High When Photographed 6 Years Later

The present year has in a number of the States, like New York, Pennsylvania, Massachusetts and Connecticut, broken all records for the number of seedlings and transplants used for reforesting purposes. This important movement to restore the rapid depletion of our national timber supply is accentuated by the co-ordinated efforts of State, County and Municipal Authorities, many Associations, Lumber Companies and those interested in reforesting generally, and by the attention also now being given the subject in very many of the public schools.

More and more attention is also being given to the selection of the proper varieties and sizes best adapted to different localities, and it is a feature of this Company to be of service from our years of experience and observation in these matters.

May we be of service to you regarding your season requirements?

FORESTRY AND LINING OUT STOCK

As this young stock doubles, triples or quadruples in value every growing season until of size for immediate planting, it is very valuable for nurseries, parks, private estates and other grounds where future planting may be required.

EVERGREENS

Per Thousand

Each "X" signifies number of times transplanted.
"S" Seedlings.

	Per Thousand
AMERICAN ARBOR VITAE (<i>Thuja Occidentalis</i>)
